Im using `UIWebView` to open a Docx file which is in form of NSData passed from another controller to webview , I am using `UIAcvitivityController` to share content on social media as well , It works fine for Image type and PDF type but it does not work for DOCX and XLSX, any thing special i need to do here

```
UIActivityViewController *activityViewController = [[UIActivityViewController alloc] initWithActivityItems:self.downloadData applicationActivities:self.applicationActivities];
```

ios

objective-c

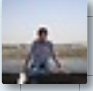

xcode

uiwebview
